

Grandfather jailed for rape

A court in Luweero, in central Uganda, has sentenced a 42-year-old grandfather to 60 years in jail for raping three of his grandchildren and infecting them with HIV/Aids. A report on the [eNCA](#) site notes that **the High Court heard that Kiyanda resident Joseph Ssemuwemba raped the girls who were between nine and 12 in 2015** while they were at his home. Justice Anna Mugenyi relied on well-collaborated prosecution evidence, medical reports and victim evidence before passing the sentence.
