

FNB launches new app feature

* FNB last week launched a new functionality on its banking app that enables customers to securely list and sell their homes privately to buyers who most likely qualify for a home loan – while claiming a cost saving associated with the process. FNB's Nav Home service helps customers to search for houses, get pre-selected for finance and uncover associated costs with calculators. To date, **Nav Home has over 1m unique visitors and has paid out R4.7bn worth of home loans since inception.**
